

bluePump

Precision pump station

Pump station for high precision metering of adhesive via gear pumps. Outstanding process control due to the exact placement between melting unit and coating head. Optional air heaters for spray application. Control system from Siemens SPS with profibus and touch panel or with a profinet connection for integration into complete system.

Temperature sensors:
PT100 or FeCuNi

Technical data	bluePump
Quantity pumps	1 - 4
Quantity output ports	1 - 4
Temperature range	50 - 220°C
Air heater (optional)	1 - 4
